DETAILED ACTION

This action is responsive to applicant's amendment filed March 24, 2005.

The amendment has overcome the rejection in the previous Office Action Mailed September 24, 2004. However, the amendment does not place the present claims in condition for allowance for the following reasons:

Claim Rejections - 35 USC § 112

Claims 21-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The suture per se and the method steps are not clear. The preamble indicated that the suture already has a loop, whereas the body of the indicated that a loop is formed in a manipulative step. It is not clear how the "attaching" and the "moving" steps are related. Further, there is no clear support for extending the suture through the cannula after pulling on the suture free end.

Claim 21, "though" should be - - through - - at the fourth line from the bottom.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Barker et al (US Patent 5,540,703). The patent to Barker et al discloses a method of suturing tissue by the following method steps:

- selecting a tissue to be moved (C1, C2, in figure 35);
- inserting a cannula through a patient's skin and extending the suture through the cannula (figure 32, cannula is inserted);
- attaching the suture to the tissue (figure 35);
- moving the tissue by pulling the free proximal portion of the suture (column 8, lines 52-60 and figure 35 arrow);
- loop is formed by threading a length of suture the lumen and the suture is locked (see figure 31).

Concerning claim 24, see figure 21; claims 22-23, see column 12, lines 56-64; claim 29, column 12, lines 4-5.

Response to Arguments

Applicant's arguments with respect to claims 21-29 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3731

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
